Reflect on a project that you've participated in. This project does not have to be Information Technology related. Did you team use Predictive, Agile or a hybrid methodology. Tell me about your experience.

Recently I completed my anivibes personal project which is linked at <https://anivibes.vercel.app> which is developed in react js and utilises the latest technologies like react router v6 and redux toolkit with react 18. This app was developed with agile methodology with small and frequent changes accomplished through a version control system git.

Download Visual Paradigm and practice! Recreate the class diagram and object level sequence diagrams in the attached material. **Instructions for how to do that are in the "Course Notes" folder, "SYD366 Notes"**. Be sure to change the note to reflect your name and section. Copy the diagrams into this word document and attach the .vpp file to your assignment. Remember to submit this document as a PDF.
